20th UGOL ROSSII & MINING convinced with International Flair and Complete Market Overview in the “Coal Capital” of Novokuznetsk

With over 760 exhibitors from 25 countries UGOL ROSSII & MINING, the most important trade fair for Mining Technology, Exploration, Underground Mining and Open-Cast Mining, Mineral Processing as well as Coal Processing in Russia concluded its 20th edition. To the tune of 25,000 visitors gathered information on the latest technologies in these industries at the Kuzbasskaya Yarmarka Exhibition Center in Novokuznetsk from 4 to 7 June. This means that the organizers Messe Düsseldorf GmbH and Kuzbass Fair succeeded in holding the biggest and most international trade fair ever held in Novokuznetsk.

On a total exhibition area of 41,500 square metres next to the well-known names from the Russian Federation there were also 192 internationally renowned exhibitors from Australia, Austria, Belarus, Belgium, Canada, China, Czech Republic, Germany, Denmark, Finland, France, Italy, Kazakhstan, Norway, Poland, Russia, Spain, Sweden, Switzerland, Taiwan, Turkey, Ukraine, USA, Uzbekistan, and the United Kingdom exhibiting their products. In addition to this, there were joint stands from the United Kingdom (ABMEC), Poland and the Czech Republic. Forming part of a strong German presence a dozen exhibitors from North Rhine-Westphalia also “showed their colours” in a small, subsidized group – ideal circumstances also for gaining and retaining market shares in Russia.

When it comes to the continued success and growth of this event, the exhibitors’ testimonials speak for themselves:

“The Russian market is an important market for us. One of 3 markets. UGOL ROSSII & MINING is *the* industry meeting point for us and therefore

a key fixture in our agenda. For our industry this is the most important place. Therefore we met the 3 most important customers on the first day of the trade fair already,” says Frank Kriechel, Head of the Product/Market Segment Mining Europe at ContiTech Transportbandsysteme GmbH, assessing the event.

“For the mining industry UGOL ROSSII & MINING is the most important event of the year. Here in the Kuzbass basin you meet all key accounts in one place,” says Richard Kandzia, Proxy & Sales Manager Materials Handling at Thiele GmbH & Co. KG in Iserlohn.

Commenting on the trade fair, Thomas Blak, Sales Engineer at Eickhoff Bergbautechnik GmbH in Bochum, said: “As coal mining in Germany is dwindling the Russian mining industry with giant potential is getting more and more important and this is why we are represented at UGOL ROSSII & MINING every year.”

A current focal theme is safety and health at the workplace. Innovative technologies and know-how are as highly demanded as ever. The Russian state is asking for more safety precautions. Nearly all companies invest in the expansion of their capacities.

With this in mind approximately 40 companies at UGOL ROSSII & MINING presented technologies for the early detection of, and protection against explosive gases as well as personal protective equipment at the Special Show “Safety and Health at Work“, which was also supported by the Düsseldorf-based No.1 trade fair A+A 2013.

The 21st UGOL ROSSII & MINING will be held from 3 to 6 June 2014 in Novokuznetsk.
